EXPERIENCE

St. Padre Pio Medical Center (Project Manager)
Ozamiz - Philippines
2025

Managed the development and implementation of Hospital Management Systems (HIS, EMR, Queue System, POS for Pharmacy/Grocery), overseeing project planning, cross-functional team coordination. Ensured compliance with data privacy regulations and implemented robust security measures to protect sensitive patient and financial information.

Decillion Australia (Developer)
Melbourne, Australia
2024 - 2025

Developed and maintained desktop applications for banks and financial institutions in collaboration with overseas teams, managing migration from legacy systems to modern technologies from older .NET Framework to latest and using Microsoft SQL Server as database.

Virtual AI (Developer)
Hertfordshire - England
2022 - 2024

Developed and maintained data scraping applications using C# .NET Core technologies and PostgreSQL. We used Entity Framework, JSON API, Page Source JSON as the extraction method.

Casthub I.T. Services (Project Manager)
Davao - Philippines
2019 - 2021

Managed in the development of desktop applications for a multipurpose cooperative like inventory system, payroll system and other integrated systems using C# and MySQL.

EXPERTISE

- **Backend Development (C#, VB, .NET, Entity Framework)** – Designing and implementing server-side logic, APIs, and database interactions using Microsoft development technologies.
- **Databases (MySQL, PostgreSQL, Microsoft SQL Server)** – Managing, optimizing, and querying relational databases for application data storage and retrieval.
- **Multimedia (Adobe Photoshop, Premiere Pro)** – Creating and editing visual and video content for presentations, documentation, and system UI assets.
- **MS Office Applications** – Utilizing Word, Excel, PowerPoint, and related tools for documentation, reporting, and presentations.
- **Project Management** – Planning, executing, and overseeing projects to ensure timely delivery, budget adherence, and quality outcomes.
- **System Integration** – Connecting and harmonizing different software systems to ensure smooth data flow and interoperability.
- **Data Privacy and Security** – Implementing measures to safeguard sensitive data and ensure compliance with privacy regulations.
- **Technology Transition** – Managing migration from legacy systems to modern platforms to improve performance and maintainability.
